THE PROBLEM:

- **SCRATCHING!**
- **FLAKY SKIN!**
- **SHEDDING!**
- **DULL COAT!**

... caused by a lack of polyunsaturated fats in a pet's diet.

THE SOLUTION:

It's a fact—some pet foods are low in *polyunsaturated fats*. But LINATONE® Food Supplement can make up for the deficiency. Why? Because LINATONE is rich in *polyunsaturated fats*—nutrients essential to the proper functioning of skin glands.

Skin glands need *polyunsaturated fats* to help curtail *EXCESSIVE SHEDDING*. And to produce soft, supple skin that discourages *SCRATCHING* due to *DRYNESS* and *FLAKING*. *Polyunsaturated fats* are also important to hair lubrication, a must for overcoming the dry look and unpleasant feel of *DULL COATS*.

Add just teaspoons-a-day of LINATONE to your pet's food. He'll love the taste. And we **GUARANTEE**—after thirty days—you'll love the results. Or we'll **REFUND YOUR PURCHASE PRICE**.

LINATONE is sold in pet shops everywhere.
